Publications

While still only in the third year of my PhD I have 3 first-author papers, and 14 contributing author papers. The software I wrote for presenting cosmological data is being used by the Dark Energy Survey (DES; a major international cosmology survey, of which I am a part) for all of their main results, including the Year 1 Results, (DES collaboration et al. 2018) which has 169 citations within one year of submission.

We are about to publish a series of 8 papers, the first supernova cosmology papers to emerge from DES, for which I am a primary author. These are available on arXiv and being sent to journals.
