Education

2016–2020 **Doctor of Philosophy**

University of Queensland

Analysing supernovae in the Dark Energy Survey using Hierarchical Bayesian models to help constrain the nature of dark energy.

2010–2015 **Bachelor of Science** (Physics)(Hons, 1st)

University of Queensland

Thesis: Analysed the Baryon Acoustic Oscillation signal imprinted in the large scale structure of the universe using the WiggleZ survey. Won the Astronomical Society of Australia's award for best Australian Astrophysics honours thesis of the year.

2010–2014 **Bachelor of Engineering** (Software)(Hons, 1st)

University of Queensland

Thesis: Created the first online client-only web-application to compute redshifts from telescope spectra. Won the GroudProbe prize, IEEE student thesis prize and IET student prize.

Experience

2020 **COVID-19 Critical Care Consortium**

Brisbane, Queensland, Australia

Lead Data Analyst

Technical lead for the COVID-19 Critical Care Consortium. Created the data pipeline to automatically produce machine-learning-ready data products for use in the study. Created reports for clinical staff and hosted a dashboard for use in hospital sites to provide insights from the data products.

2020 University of Queensland

Brisbane, Queensland, Australia

Postdoctoral Researcher

Continued research in the areas of supernova cosmology and large scale structure, focusing heavily upon analysis pipelines and systematics control through efficient use of simulations and mocks.

2019 **SuperDataScience**

Sunshine Coast, Queensland, Australia

Course Instructor

Created a course on statistical analysis in Python for students. Focused on applied statistics and utilisation of modern code packages, with attention given to visual output and workflows for continuous validation of methodology.

2017, 2016 Lawrence Berkeley National Laboratory

Berkeley, California

Research Fellowship

Research fellowship to work on Bayesian Hierarchical Modelling and its applications to Supernova Cosmology. Specifically, investigating how to use high dimensional hierarchical models to model individual supernova instead of populations to provide better constraints on cosmology using supernova discovered by the Dark Energy Survey.

2015–2016 **Gemini & Australian Astronomical Observatory**

La Serena, Chile

Research Intern

Utilised photometric data of Maffei 1 to determine globular cluster candidates and their properties for spectroscopic follow-up. Utilised data reduction pipelines, automated analysis methods in Python, and applied machine learning techniques to perform object classification.

2010-2014 **GBST**

Brisbane, Queensland, Australia

Software Developer

Developed business intelligence reporting solutions, designing and developing server and client based web application code, creation of large scale SQL queries, optimising queries, databases and applications for network, processing and memory constraints, developed back-end server code and front-end web applications.
