## Education

| | | |
|---|---|---|
| 2017–Now | **Doctor of Philosophy** | University of Queensland |

Analysing supernovae in the Dark Energy Survey using Hierarchical Bayesian models to help constrain the nature of dark energy.

| | | |
|---|---|---|
| 2010–2016 | **Bachelor of Science** (Physics)(Hons, $1^{st}$) | University of Queensland |

Thesis: Analysed the Baryon Acoustic Oscillation signal imprinted in the large scale structure of the universe using the WiggleZ survey.

| | | |
|---|---|---|
| 2010–2015 | **Bachelor of Engineering** (Software)(Hons, $1^{st}$) | University of Queensland |

Thesis: Created the first online client-only web-application to compute redshifts from telescope spectra.

## Experience

| | | |
|---|---|---|
| 2010–2014 | **GBST** | Brisbane, Queensland, Australia |

*Software Developer*
Developed business intelligence reporting solutions , designing and developing server and client based web application code, creation of large scale SQL queries, experience optimising queries, databases and applications for network, processing and memory constraints, developed back-end server code and front-end web applications. Prioritised implementation tasks for strict release schedules, delegated work tasks for other developers and reviewed incoming work for quality.

| | | |
|---|---|---|
| 2015–2016 | **Gemini & Australian Astronomical Observatory** | La Serena, Chile |

*Research Intern*
Utilised photometric data of Maffei 1 to determine globular cluster candidates and their properties for spectroscopic follow-up. Utilised data reduction pipelines, automated analysis methods in Python, and applied machine learning techniques to perform object classification.

| | | |
|---|---|---|
| 2016 | **Lawrence Berkeley National Laboratory** | Berkeley, California |

*Research Fellowship*
Research fellowship at LBNL to work on Bayesian Hierarchical Modelling and its applications to Supernova Cosmology. Specifically, investigating how to use high dimensional hierarchical models to model individual supernova instead of populations to provide better constraints on cosmology using supernova discovered by the Dark Energy Survey.
